DETAILED ACTION

This Office Action is in response to Amendment A, Paper No.5, dated 3/4/03.

Election/Restrictions

Newly submitted claims 31-38 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 31-38 pertain to a separate and distinct species from the claims currently pending in the Application. Claims 31-38 pertain to a trench having a charge balancing region along its sidewall. Claim 1 has no charge balancing region rather has balancing densities formed within a semiconductor layer.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 31-38 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-18, as amended, are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled

Art Unit: 2813

in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant's amended claim language recites "*a drain region having a trench with first and second sides*"; further, Applicant's amended claim language recites "*a first region in the drain region, having a second conductivity type and a second charge density balancing the first charge density*". However, such claim language is not enabled by the specification. The Examiner did not find support within the Applicant's specification to support the existence of the above limitations within the ***drain region*** as recited. Rather, the specification indicates that the trench and first and second conductivity types exist in the semiconductor layer. Consequently, Applicant's amended claim language is non-enabled by the specification.

Response to Arguments

Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2813

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
